

A group of students and a man in an office setting. The man, identified as Mayor Joaquín, is seated at a large, ornate wooden desk. He is wearing a dark jacket and has his hands clasped. Several students are present: one is seated to the left of the desk, another is standing behind him, and others are seated to the right. The room features a large, dark wooden cabinet or bookshelf in the background.

Bike path

'Last 31st of January; five students had a meeting with the Mayor called Joaquín, the Education and the Youth participation Councillors in order to ask for a bike path to access to our secondary school.

Jesus, a student with Special needs (he can't walk) was coming with us as the bike way should also suppose to suppress architectural barriers.

The meeting was really cordial and the Spanish students were really heavy negociators. Finally the mayor told the students that a bike parking would be given to the Primary and Secondary school

A man and a student in conversation. The man is seated on the left, looking towards the student on the right. The student is wearing a dark jacket and glasses. They are in a room with a Spanish flag and a blue flag visible in the background.

He also said that it could be difficult to build the bike path inside the village as many people would complain because of the lack of room for car parkings. Instead, the mayor and the students agreed in trying to make the bike path to reach to "el llano de la Estrella" which is five km long from the village center. This should be a nice place to go riding.

After the formal appointment the five students and the teachers had a breakfast and went back to school.'
